MAN LION’S CITY.
Welcome to the citybus family.
As a partner to transport services and operators of local public transport, MAN presents products satisfying the major requirements of transport services: flexibility, comfort and convenience, safety and protection of the environment. Today, more than ever, the focus is on cost/benefit. Maximum efficiency is the order of the day. The Lion’s City low-floor city buses are the answer to these questions. They are cleaner and more fuel-efficient than ever before, and use the environmentally-friendly Euro 6 exhaust technologies that currently apply. Regardless of whether the vehicle is driven by a diesel engine or natural gas, the MAN city buses meet the highest emissions requirements and remain highly economical. Being efficient also means satisfying individual demands and having the right solution for every requirement that comes along. From the Lion’s City Low Entry city service bus, the MAN family of city buses includes models of all lengths from 10.5 to 18.75 metres, and offers you the highest levels of efficiency as Lion’s City, Lion’s City M, Lion’s City G/GL and Lion’s City LE models (Low Entry). Climb on board!
Efficient all along the line: the Lion’s City.

The Lion’s City sets the tone. It primarily offers new highlights when it comes to comfort and convenience, safety, cost-effectiveness and sustainability. The extremely quiet air-conditioning system, for example, not only ensures a pleasant temperature on board, but also more energy efficiency and a significant weight saving. The enhanced electronics structure increases reliability and improves operating safety. The driver, for example, also benefits from this at the ergonomically designed MAN workplace with new instrument panel of the Kibes 32. For added active driving safety, all Lion’s City non-articulated buses now come with the ESP electronic stability programme as standard. The segmented side walls contribute to reducing repair and LCC costs, as they are considerably faster to replace. And the Lion’s City makes a visual statement too. Thanks to the newly designed central front flap, for instance, which optically unites the Lion’s City with the standard MAN product portfolio design. Last but not least, Lion’s City buses are certified for the “Blue Angel” environmental label – a seal of quality for the protection of health and the environment.

A whole series of highlights.

- Energy-optimised air-conditioning system with significant weight saving
- ESP electronic stability programme comes as standard for non-articulated buses
- Segmented side wall for reduced repair times/costs
- KIBES 32 electronic structure
- Eco-friendly drive technologies
- “Blue Angel” seal of quality for Lion’s City buses
- LED daytime driving lights and technology
- Black central front flap
We stand the engine upright so that as many passengers as possible can take a seat.

The 12 meter long Lion’s City with tower-design engine makes space in a way that is second to none. The engine is upright at the rear left of the bus, freeing up even more valuable space for the passengers. There is a standing-only platform at the rear right, although this space can also be used to accommodate a three-seat bench.

Smart ideas smartly implemented.

- Upright common-rail engine
- Standing platform at the rear right
- Three-seat rear bench
- Semi-circular bench seat opposite door No. 3
- Easy servicing through ease of access
- Less vehicle weight for lower fuel consumption

Feel-good space for passengers.

Functional and comfortable. The Lion’s City.: The interior ambience of the 12m Lion’s City is characterised by friendly, harmonious colours. The new emergency exit hatches made of safety glass flood the interior with light, creating a pleasant atmosphere. Comfort and functionality are the main features. Entrance, exit and centre aisles are all low-floor. The leaning function enables the rear side to lower by up to 80 mm. The ergonomic seats are vandal-proof, very easy to clean and have no underseat props. Needless to say, the Lion’s City is compliant with EU Directive 2001/85/EC, including the provisions for the carriage of reduced-mobility passengers.

Inviting in every way.

- Emergency exit hatches made of safety glass
- Ergonomic seats with optimised legroom, vandalproof
- Seats are cantilevered with no underseat props, so cleaning is quick and easy
- Integrated folding ramp for wheelchairs and infant buggies
- Emergency exit hatches made of safety glass
- Infotainment (WLAN provision, USB charging sockets)
- Bright interior flooded with light
- E-ticketing (electronic travel tickets)
The cockpit for the City pilot.

A comfortable command post.
The attractive design of the driver’s workplace meets the expectations of a classy car cockpit. Everything is oriented towards the driver. The controls are logically laid out and effortlessly reachable. All the important information is available at a glance and all the instruments are easily readable in daylight and at night. The focus is the liquid-crystal display for operating and diagnostic data. The ticket dispenser and register can be integrated into the cab door and colour-matched to the interior design through various attachment options. And of course a driver’s workplace compliant with the VDV guidelines issued by the Association of German Transport Organisations is also available as an alternative.

Sit comfortably, drive at ease.
The comfortable, highly adjustable driver’s seat supports an ergonomic posture. The height and angle of the steering wheel can also be adjusted to suit the driver. In this cockpit, everything is just right: the driver feels immediately at home with the layout, can concentrate on driving, and feels better all round.

What drivers like.

- Ergonomic cockpit with conveniently positioned controls
- Uncluttered instrument panel layout
- Ergonomic seat for fatigue-free driving
- Adjustable steering wheel
- Liquid-crystal display for operating and diagnostic data
- Good view through downswept windscreen and wide-angle mirrors
Very large in the smallest of streets. The Lion’s City M makes every corner.

The Lion’s City M is a true contortion artist. Thanks to a length of only 10.5 metres and a reduced wheelbase of just 4.40 metres, the smallest member of the family is also the most manoeuvrable. The Lion’s City M’s sensational 18 metre turning circle ensures problem-free manouevring through winding streets and narrow alleyways, whilst not neglecting comfort. Be it a two or three-door model, this small bus has an extremely high capacity for its size, and takes up to 83 passengers.

Keeping the driver in mind.

For the driver too, the Lion’s City M is the perfect city bus, especially at peak times. Drivers are won over by the utmost comfort and state-of-the-art technology. A VDV or MAN driver’s workplace with rev counter and optimum night lighting, and an innovative mirror system with integrated wide-angle mirrors and folding right-hand housing, as well as an integrated optional halogen spotlight on the right, leave nothing to be desired. An FMS interface 2.0 for connecting additional data devices is also available on request.

Bus size made to measure.

- Lion’s City M with 10.5 metre length, two and three doors
- Capacity for up to 83 passengers
- Rear axle fitted with twin tyres to maximise the use of interchangeable parts and simplify tyre handling
- MAN SDT technology
- Modern and efficient automatic gearbox
- Extremely good turning circle of just 18 metres
Comfort in two lengths. Lion’s City C and L lead the way.

Satisfying specific demands. If the capacity of a 12-metre bus is not enough but an articulated bus too large, MAN has an alternative to match: the Lion’s City C with the convenient length of 13.7 metres and the Lion’s City L with a vehicle length of 14.7 metres are efficiency made to measure. These three-axle drive buses feature convenient seating capacity, manoeuvrability and compactness. They come with up to 49 seats and capacity of up to 106 passengers. The turning circle is just 24.7 metres, due in no small part to an electrohydraulically steered trailing axle. MAN offers the Lion’s City C solely with three doors; the Lion’s City L is also available with two doors. All imaginable types of door from MAN’s own door system are featured. The benefits are harmonised, fast and direct opening and closing of doors and a modular design. Another advantage is their ease of maintenance and the availability of inexpensive spare parts.

Well engined – with diesel or natural gas.

The torquey engines of the Lion’s City C and L not only generate economic efficiency, they also satisfy ambitious demands for low environmental impact. Two modern Common-Rail diesel engines with 235 kW (320 hp) or 264 kW (360 hp) are available in accordance with Euro 6. A natural gas engine with 228 kW (310 hp) is also available in Euro 6 version. From the outside, the naturally-gas powered bus can be recognised by the attractively styled hood on the roof covering the new gas tanks. Although there are fewer bottles, the performance is still just as strong. The natural gas fuel consumption display provides additional information for the driver on the gas fill level.

Bus sizes made to measure.

- Lion’s City C with 13.7 metre length, three doors
- Lion’s City L with 14.7 metre length, two and three doors
- Capacity of up to 106 passengers
- Electrohydraulically steered trailing axle
- MAN SCR technology
- Small turning circle
Efficiency is a constant. The Lion’s City G and GL articulated buses.

Smoothly through the rush-hour traffic. Right out on the city’s busiest thoroughfares, there is one cool head amid all the hustle and bustle: the Lion’s City G. Its enormous passenger capacity is up to dealing with any rush-hour challenge. Up to 150 passengers can be accommodated comfortably in the 18-metre-long Lion’s City G. The Lion’s City GL is longer by 75 cm and is well up to carrying 165 passengers. In terms of design, comfort and technology, the articulated buses are completely in line with the MAN concept. That means: quality in every detail. A turning circle shy of 24 metres makes for easy handling. The extremely low pivoting joint makes the bus particularly convenient. In terms of innovation, MAN articulated buses are lengths ahead of the field.

A small step for the passengers. A big step toward more convenience. The stepless entries are very low, so it is easy for elderly persons to board the bus. The bright, colourful interior makes the passenger compartment inviting and cheery. The ergonomic MAN Light passenger seat and the ample legroom it provides mean greater passenger comfort. Standing passengers can take a firm grip of uprights and handrails. Infant buggies and wheelchairs are also conveniently positioned and fold-down seats for accompanying persons are next to them. No question about it, MAN has thought of everything.

Low-floor perfected. The pivoting joint with integrated bend stop allows a very low centre aisle, so the low-floor configuration offers the optimum ease of access that all passengers can enjoy. The double bellows adapter is another innovation. The inner bellows takes the place of the side slide guards. A translucent folding bellows for articulated buses and the new emergency exit hatches made of safety glass flood the interior with light, creating a pleasant atmosphere. The floor covering is very flat and is made of a special resilient material. It is easily replaced if damaged. Visual appearance is much improved, and the same applies to the feeling of space inside the articulated bus.
The multi-talent: Lion’s City LE (Low Entry).

Appealing in the city and in the country.

The Lion’s City LE embodies a versatile bus concept that cuts a fine figure on city thoroughfares and shines under sunny highways and byways. Proven quality and technology have enabled this low-entry bus to earn not only the hearts of passengers, but also the minds of fleet operators and transport company directors. This is a 12-metre bus that packs a lot of punch in terms of passenger comfort and price/performance ratio. This is due primarily to the fact that many components from the MAN Lion’s City family were incorporated into the design of the Lion’s City LE. Not sure whether to opt for the city service bus or the intercity version? The best idea would be to take both.
Everyone enjoys boarding this bus.

Two versions, one claim to quality. The entry-step height at both plug doors is a convenient 370 mm. The Lion’s City LE has a step height of only 320 mm, so it is even easier to board and exit. Both versions feature the kneeling function as standard, so they offer every assistance to persons of reduced mobility. Lifting gear and a wheelchair ramp at door No. 2 are available as optional extras. Both are standard equipment on the city service bus.

Robust and inviting. Achieving a sense of space in the low-floor Lion’s City LE: where everything has its place, looks good and is easy to clean. Strong and comfortable seats invite passengers to relax at their ease. The seat back is a robust and easily cleaned plastic moulding. The Lion’s City LE Ü intercity service bus comes ex-works with two 200 mm low-rise platforms on right and left between doors 1 and 2. The seat cushions feature wooll-plush material covers. Each seat has an integral hand grip and can be supplied on request with a side armrest.

Low entry, high efficiency. The MAN Lion’s City L LE, G LE and LE Ü city and intercity buses, in lengths ranging from 13.7 m to 18.75 m, are available in a new Low Entry design. Thanks to the clever combination of the low-floor and low-entry concepts, the special Lion’s City version are able to impress with features such as a lower vehicle height and a greater number of seats with seats arranged in the direction of traffic. The underlying low-floor concept makes a low vehicle height possible and at the same time reduces the cost of repair and maintenance.

Lion’s City LE/LE Ü city service bus.

- Single- and double-leaf hinged doors
- Single-leaf plug door behind rear axle is optional
- No platform between front axle and door No. 2 (platforms optional)
- Entry heights LE 330 mm/LE Ü 370 mm
- Up to 43 row seats
- LE tyres 275/70 R 22.5, LE Ü tyres 295/80 R 22.5
- 6-cylinder inline engine, Common Rail, vertical
- 6- and 4-speed automatic transmission
The drive to greater efficiency.

You’ll notice it every time you drive off and accelerate; you’ll feel it over every mile you travel. The Common Rail diesels from MAN develop compellingly powerful pulling torque andlog astoundingly appealing consumption figures. They are also, very reliable, as reflected in the long service intervals. Together with the brand new four and six-speed automatic gearboxes with topography-dependent control, the engines with ratings of 184 kW (250 hp) to 265 kW (360 hp) give the Lion’s City buses supremely capable performance. The range also includes spotlessly clean natural-gas-powered engines (CNG) as 6-cylinder propulsion units with 200 kW (272 hp) and 228 kW (310 hp).

High-tech for high environmental protection targets.

A clean lead.

MAN relies on a combination of exhaust gas recirculation (EGR) and selective catalytic reduction (SCR) to achieve the required reduction in harmful emissions. This results in a considerable reduction in fuel consumption, thus benefiting both the environment and the economy. This combination of the MAN Euro 6 diesel engine and residues is particularly environmentally friendly. Or you can choose the MAN Euro 6 gas otten. Operated by biogas, it is also carbon neutral. Our successful hybrid technology is especially suited to the sensitive nature of inner city travel.

* In certain non-European countries, engines in Euro 4, Euro 5 or EEV standard are permitted.
MAN Services.
Your coach in the best hands.

Maximum quality over the maximum vehicle service life and excellent availability – that’s our promise to you. With a wide-ranging portfolio of services, we offer 360° support that is both efficient and reliable. You can rest assured at all times: your MAN coach is in the best hands with us.

MAN services offer everything your coach needs, meaning that your MAN coaches are always operated in the best possible conditions and that you can profit from your vehicles for even longer. With MAN ServiceContracts or MAN Mobile24: your mobility is our concern. That is true of our additional services too. MAN services, for instance, have tailored solutions on hand to optimise operating your vehicles, increase profitability and increase efficiency. Whatever service you choose, you’re always on the right road with MAN.
